CoP

report

The annual report from the Clinical Decision Support Systems Community of Practice

EXECUTIVE SUMMARY

The Clinical Decision Support Systems Community of Practice (CDSS CoP) brings together like-minded organizations to share resources and best practices to foster collaboration, improve services, and promote knowledge exchange in the CDSS field.

CDSS CoP snapshot

17 Core Group members
19 CDSS projects
40 implementations
24 countries
300M people served

Originating from the [eIMCI Working Group](#), the CDSS Community of Practice (CoP) was formally launched in [February 2023](#). Rooted in Switzerland and active in resource-constrained settings, the CoP is led by Terre des Hommes (TDH), the Swiss Tropical and Public Health Institute (Swiss TPH), and Doctors Without Borders/Médecins Sans Frontières (MSF) and is hosted by the Geneva Digital Health Hub ([gdhub](#)), a hub established at University of Geneva to catalyse digital health implementation and knowledge sharing.

The CDSS CoP is founded on the shared belief that collaboration is essential to overcome fragmentation, duplication of efforts, and gaps in evidence that limit the impact and sustainability of CDSS initiatives worldwide.

In 2025, the community focused on **diversity, accountability and visibility**, supporting the engagement of new participatory organisations. In June, the **CDSS CoP Core Group** was launched with the core mission of building lasting and valuable connections among its members.

Key Activities and Achievements

- **Expanded governance** from a 4-member Core Team to a 17-member Core Group, representing 19 projects and nearly 40 implementations across more than 20 countries. The group fosters peer exchange, collaboration, and shared problem-solving on CDSS implementation challenges.
- **Expanded the CDSS knowledge base** and mapping projects to generate actionable insights on the [Digital Health Atlas](#).
- **Generated evidence** through research, including a PhD on mapping and analyzing knowledge-based CDSS, with a focus on sustainability.

Table of contents

Team & Governance	_____	04

Abbreviations

CDSS	Clinical Decision Support Systems
CoP	Community of Practice
IMCI	Integrated Management of Childhood Illness
Swiss TPH	Swiss Tropical And Public Health Institute
gdhub	Geneva digital health hub
TDH	Terre des hommes
MSF	Médecins Sans Frontières
ICRC	International Committee of the Red Cross
NCDs	Non Communicable Diseases
RCH	Reproductive and Child Health
RMNCH	Reproductive, Child, Maternal, and Neonatal Health

Team & Governance

There are 3 organizations in the Core Team. The gdhub is acting as the host institution providing support in the management of the Community of Practice.

The core team dedicated time to establishing and defining the CDSS CoP key workstreams perceived as critical to fostering ecosystem shifts in the CDSS space.

2025 strategic priorities

The CDSS CoP has focused on three strategic priorities : Diversity, Accountability and Visibility.

01 — Diversity

After two years of community development, the CDSS CoP expanded its governance by **opening the Core Group to additional projects**. This change aimed to better reflect the diversity of the CDSS ecosystem. The community now includes a wider range of health topics beyond IMCI (Integrated Management of Childhood Illness), along with broader geographic representation, organizational diversity, and varied professional backgrounds.

02 — Accountability

In 2025, the CDSS CoP strengthened accountability by **documenting member projects and related publications** on the Digital Health Atlas. The community also linked ongoing work on CDSS between Neotree and Swiss TPH, helping reduce duplication and build synergies. This collaboration will continue in 2026 to strengthen the evidence base for CDSS implementation.

03 — Visibility

In 2025, increasing the visibility of CDSS work within the community was a major priority. The CDSS CoP encouraged members to exchange experiences, helping make shared knowledge more accessible. This **reinforced the Core Group**, promoted knowledge sharing, reduced project silos, strengthened ecosystem ties, supported learning together, and clarified common challenges.

Activities

The group has planned a series of meetings over the next 18 months.

June 2025

Kick-off meeting

July 2025

- D-Tree presentation
- CDSS mapping of projects (Talía)

September 2025

- MEDPlat Presentation
- Mapping update

November 2025

Core Team presentation :
leDA, MSF eCare,
SysRef/Sanu-TD, EPOCT+,
TIMCI, Dynamic, ALMANACH,
WHO SMART guidelines, ETAT

January 2026

- Neotree
- Technical discussion :
Interoperability

March 2026

- ComBaCal
- Technical discussion : User-centered design

May 2026

- Noviguide
- Technical discussion :
Evidence Generation

July 2026

- Almanach (ICRC)
- Technical Discussion :
Business model

September 2026

- MamaOpe
- Deliverables of the group

Key results

The CDSS CoP is using the [Digital Health Atlas](#), a global repository in collaboration with the World Health Organization, aiming to make digital health implementation knowledge a public good.

The CDSS CoP supports the expansion of the practice-based implementation insights on the Digital Health Atlas.

01

Expanding the CDSS Knowledge base

- 103 “Decision Support” projects are documented on the Digital Health Atlas, including 35 implementations from this group.
- Half of the projects in the [Digital Health Atlas](#) with documented **insights** are CDSS. The group played a major role in improving the **quality and completeness of the database**.
- The mapping methodology to study the sustainability of CDSS has been revised by the group, and data collection is now underway to expand the CDSS mapping of projects.

02

Fostering collaboration among CDSS stakeholders

The CDSS CoP followed the defined meeting schedule, convening in June, July, September and November with strong attendance across sessions. These regular meetings supported ongoing **engagement and trust-building** among members. Meeting notes were shared with the group, strengthening accountability and internal knowledge exchange.

CDSS CoP Projects (1/2)

CDSS CoP Implementations

The CDSS CoP includes over 19 projects across 24 countries, serving 300 million patients.

CDSS CoP implementations map. Some projects appear in several countries; the same program in different places counts as a separate implementation because partners and conditions vary. For a more interactive view, visit the Digital Health Atlas.

Details on projects

CDSS	Lead organization(s)	Health Topic	Countries, Scale, Dates
Sys Ref	Swiss TPH	Refugee health	Chad
MamaOpe	MamaOpe	Tuberculosis	Uganda

CDSS	Lead organization(s)	Health Topic	Countries, Scale, Dates
<u>Afya Tek</u>	D-Tree, Government of Tanzania	Maternal and Child Health	Tanzania <i>Over 300 000 people served</i>
<u>Almanach</u>	ICRC, Swiss TPH	Maternal and Child Health (IMCI)	Nigeria, Somalia, Libya
<u>ComBaCal</u>	SolidarMed	NCDs	Lesotho <i>Over 15 000 people served</i>
<u>DDD PHMP</u>	U.T. Administration of DNH & DD, Argusoft	NCDs, RCH, Vector-borne disease and more	India <i>500 000 - 1M beneficiaries</i>
<u>Dynamic</u>	Swiss TPH and partners	Maternal and Child Health	Rwanda, Tanzania <i>700 000 potentially managed</i>
<u>eKavach</u>	Government of Uttar Pradesh, Argusoft	Maternal and Child Health, NCDs	India <i>Over 5M beneficiaries</i>

<u>ImTeCHO</u>	SEWA Rural, Argusoft	Maternal and Child Health	India <i>10 000 - 50 000 beneficiaries</i>
<u>IeDA</u>	Terre des Hommes	Sexual and Reproductive Health, Maternal and Child Health	Burkina Faso, Guinea <i>Over 6M beneficiaries</i>
<u>Jami Nii Afya</u>	D-Tree, Zanzibar Government	Maternal and Child Health, Immunization	Tanzania <i>Over 1.6 M beneficiaries</i>
<u>Neotree</u>	Neotree	Maternal and Child Health	Zimbabwe, Malawi <i>60 000 beneficiaries</i>
<u>Noviguide</u>	Global strategies and more	Newborn Care (0-28 days), Pediatrics, Sexually-transmitted Infections, Intensive Care.	Democratic Republic of Congo, South Africa, Uganda and United States <i>400 000 beneficiaries</i>
<u>MSFeCare</u>	MSF	Maternal and Child Health, Immunization	Mali, Sierra Leone, South Sudan, Chad, Kenya, CAR, Tanzania, DRC <i>600 000 beneficiaries</i>
<u>TeCHO+</u>	Government of Gujarat, Argusoft	RMNCH	India <i>Over 5M beneficiaries</i>
<u>TIMCI</u>	Swiss TPH and partners	Maternal and Child Health	Tanzania, Senegal, Kenya, India
<u>Wakoko</u>	Alima, INSERM, Bordeaux University	Maternal Health	Central African Republic <i>Ongoing pilot study</i>

Conclusion

Reflecting on 2025, the CDSS Community of Practice (CoP) has continued to innovate and break down silos, strengthening collaboration and facilitating knowledge exchange across the CDSS field.

Evidence generation

- Ongoing collaboration with gdhub and Swiss TPH researcher Talia Salzmann on her PhD, documenting and analyzing the sustainability of CDSS initiatives.
- Ongoing work by Aditi Rao (Neotree) on a scoping review of AI-based CDSS projects.

CDSS project mapping

The group made significant contributions to evidence generation, with nearly 40 CDSS implementations documented in the Digital Health Atlas (DHA)—nearly half of all CDSS projects registered—and 19 implementations providing insights, accounting for half of the insights currently available in the DHA.

Community meetings

A defined calendar of meetings, held every two months since June, has facilitated knowledge sharing and discussions on common challenges, fostering collaboration among the group members.

Community members

The CoP platform remains available for members to stay informed and connected. As of 2025, 158 members are registered. A new LinkedIn group is also available to support community exchange and engagement: join the group and invite your CDSS network to participate.

Acknowledgements

This report was developed by the Core Team members :

Sophie Delaigue (geneva digital health hub), **Kallol Mukherji** (Terre des Hommes), **Talia Salzmänn** (Swiss Tropical and Public Health Institute), and **Nan Hsin Chang** (Médecins Sans Frontières / Doctors Without Borders).

We also thank the **Core Group members** who joined this year and all the community members for their engagement.

**Thank you for your
commitment and
support as we work to
strengthen
coordination across
the CDSS ecosystem.**
